

DBB VALVE SERIES

Block and Bleed Valves

DBB | MONOFLANGE | SAMPLING | CHEMICAL INJECTION

CONTENTS

Introduction	1
Application installaltions	2
Specification	3-5
Ball valve type	
OS&Y Needle type	
Glove Needle Valve type	
Block & Bleed valve	8-16
Monoflange valve	16-19

INTRODUCTION

Beyond Fluid's response to the demand for reduction in leakage paths has been the combination of primary and secondary valves into one compact unit. The combining of piping and instrument valves into a single unit has benefitted various markets.

Beyond Fluid can offer the special combination of double block and bleed valve systems together with fittings, both being designed and produced by BMT. Choise of this combination results in the elimination of taper thread connections and the need for thread sealant.

APPLICATION & INSTALLATION

SOLUTIONS

Beyond Fluid instrumentation products offer optimal solutions for integral block & bleed valves with a one-piece forged body, providing strength, compact design, and customizable end connections, body styles, and pressure ratings for versatile applications.

Conventional Installation <1>

- A welded flange, connected to a primary ANSI class isolating valve. The primary valve will be connected to a secondary instrument valve. A pressure gauge or transmitter will then be installed downstream of the instrument valve.

Beyond Fluid BLOCK & BLEED Valve <2>

- A one-piece integral forging incorporating up 3 ball valve or mixture of ball and needle design.
- Improved safety : leak paths reduced by up to 60%
- Reduced costs : installation and component costs reduced by up to 70%
- Reduced weight : by up to 80%
- Reduced susceptibility to problems caused by vibration.

Beyond Fluid Monoflange <3>

- More compact than Beyond Fluid DBB valve, adding further space and weight saving possibilities.
- Improved safety : leak paths reduced by up to 60%, less susceptibility to vibration
- Reduced costs : installation and component costs saving up to 80%
- Reduced weight : up to 85%

SPECIFICATION

Design codes

- ANSI / ASME B 16.34 - Designed to meet the pressure and temperature requirements
- ANSI / ASME B 16.5 - Flange dimensions
- ANSI / ASME B 1.20.1 - National pipe threads
- API 607 / BS 6755 - Fire safe designed

DESCRIPTION		BODY MATERIAL		
		STAINLESS STEEL	CARBON STEEL	DUPLEX STAINLESS STEEL
1	BODY	A182 F316	A350 LF2	A182 F51
2	OS & Y BONNET	A351 CF8M	A352 LCC	A182 F51
3	GLAND FLANGE	A351 CF8M	A352 LCC	A182 F51
4	INSERT	A479 TP316		S31803
5	PACKING	GRAPHITE		
6	BUSHING	A479 TP316		S31803
7	VEE TIP	SS630 + Hard Cr		
8	STEM	A479 TP316		S31803
9	FLANGE BOLT	A193 B8M	A320 L7M	A453 Gr.660
10	FLANGE NUT	A194 8M	A194 Gr.7	
11	BONNET BOLT	A193 B8M	A320 L7M	
12	BONNET SEAL	GRAPHITE		
13	DUST CAP	NYLON		
14	BAR HANDLE	A276 TP316		S31803

- 316 Stainless steel construction.
- Maximum cold working pressure rating 6,000 psig(414 bar) with PTFE seats.
- Temperature rating PTFE seats -54°C to 204°C (-65°F to 400°F)
- Maximum cold working pressure rating 10,000 psig(689 barg) with PEEK seats.
- Temperature rating PEEK seats -54°C to 232°C (-65°F to 450°F)

Features

- Two piece body design - minimize leakage paths.
- Designed to comply with requirements of ANSI/ASME B16.34.
- Bi-directional.
- Ball seats choice of seat materials : PTFE(virgin or filled)PVDF , NYLON or PEEK.
- Bubble tight shutoff.
- Floating ball principal with dynamic response seats featuring inherent self relief.
- Anti blowout stem.
- Integral compression ends available eliminating taper threads and thread sealants.
- Low torque operation.
- Connector thread environmentally sealed.
- Anti static design as standard.
- Firesafe designed to meet BS 6755 Part2 / API 607,(optional).

Outside screw and yoke(OS&Y) needle valve

DESCRIPTION		BODY MATERIAL		
		STAINLESS STEEL	CARBON STEEL	DUPLEX STAINLESS STEEL
1	BODY	SS 316	A350 LF2	A182 F51
2	BONNET	SS 316	A350 LF2	A182 F51
3	PACKING	GRAPHITE		
4	PACKING GLAND	A479 TP316		S31803
5	PACKING BOLT	SS 316	A350 LF2	S31803
6	STEM	A479 TP316		S31803
7	VEE TIP	SS630 + Hard Cr		
8	LOCK NUT	SS 316	A350 LF2	S31803
9	BONNET SEAL	GRAPHITE		
10	DUST CAP	NYLON		
11	BAR HANDLE	A276 TP316		S31803

- 316 Stainless steel construction.
- Maximum cold working pressure rating 10,000 psig(690 bar).
- Temperature rating -54°C to 538°C (-65°F to 1000°F).

Features

- Externally adjustable gland.
- PTFE or Graphite packing for bubble tight sealing.
- Self centering crimped needle tip for bubble tight shut off and repeatability.
- All componets stainless steel .
- Firesafe certified to BS6755 part 2/API 607.
- Flange gasket seal ensures a bubble-tight between body and yoke.
- Back seat design provides secondary stem sealing and prevents stem blow out.
- Rolled stem operating threads.
- Independent stem thread bush with maximum female thread interface.
- Colour coded close contact dust cap and function label for easy indentification.

Glove style needle valve

DESCRIPTION		BODY MATERIAL		
		STAINLESS STEEL	CARBON STEEL	DUPLEX STAINLESS STEEL
1	BODY	SS 316	A350 LF2	A182 F51
2	BONNET	SS 316	A350 LF2	A182 F51
3	PACKING	GRAPHITE		
4	PACKING GLAND	A479 TP316		S31803
5	PACKING BOLT	SS 316	A350 LF2	S31803
6	STEM	A479 TP316		S31803
7	VEE TIP	SS630 + Hard Cr		
8	LOCK NUT	SS 316	A350 LF2	S31803
9	BONNET SEAL	GRAPHITE		
10	DUST CAP	NYLON		
11	BAR HANDLE	A276 TP316		S31803

- 316 Stainless steel construction.
- Maximum cold working pressure rating 10,000 psig(690 bar).
- Temperature rating -54°C to 538°C (-65°F to 1000°F).

Features

- Rolled stem operating theads for low torque operation.
- Gland packing in PTFE or Graphite for bubble tight sealing.
- Colour coded close contact dust cap and function label for easy identification.
- Self centering crimped needle tip for bubble tight seat sealing.
- Close contact dust cap for operating thread protection.
- Packing bolt with easy access.
- Lock nut for vibration protection.

Block & Bleed valve

Features

- ANSI B16.5 flanged inlet connections 1/2" to 3" sizes.
- Class 150 rated to class 2500 rated.
- 1/2"-14 to 1"-11.5 NPT(female) standard outlet (depending on bore size).
- 1/2" NPT(female) standard vent.
- Standard materials of connection: Stainless steel ASTM A182 F316/F316L, Carbon steel ASTM A350 LF2/A105, Duplex ASTM A182 F51.
- Optional materials on request.
Stainless steel ASTM A182 F316/F316L.
Carbon steel ASTM A350 LF2/A105.
Duplex ASTM A182 F51.
- Raised face and ring type joint flange face styles.
- One-piece forged construction flange as standard.
- Fire safe designed (and tested) to meet BS 6755 Part 2/API 607.
- 304 stainless steel handles and trim as standard to reduce the risk of corrosion.
- Designed to meet the pressure and temperature requirements of ASME/ANSI B16.34/B16.5.
- Pressure boundary designs calculated to ASME VIII Div 1 and verified by testing.
- Heat code traceable material to EN 10204.3.1.
- Bubble tight shut off.
- Locking and anti tamper devices for all valve types available option.
- Positive lever stop.
- User preferred handles.
- Permanent affixed reference label.

SAMPLING VALVE

This manifold range is designed to replace conventional multiple-valve installations where sampling of the process stream is required. This design has been developed to remove a sample directly from the process stream at full system pressure.

Sampling probe

The probe length must be specified from the raised face to the end of the probe in mm , to the nearest mm. Probes are supplied to suit the insertion length required by the pipeline and thus must be specified by the customer

CHEMICAL INJECTION VALVE

This manifold range is designed to replace conventional multiple-valve installations where injection into the process stream is required. This design has been developed to inject directly into the process stream at full system pressure.

Injection quill

The probe length must be specified from the raised face to the end of the probe in mm . Probes length shall be decided in consideration of injection insert length in the pipeline and customer's request.

Non return check valve

This poppet type spring return valve has a viton soft seal(SEPOOL standard)

FUGITIVE EMISSION

ISO 15848 parts 1&2 (defining a classification system and qualification procedures, and production acceptance test of industrial valves, respectively)

specify new ultra low standards for emissions. This standard is becoming the requirement for oil and gas and petrochemical organizations worldwide. The standard was originally created for process valves and control valves but is now being applied to Instrument valves which include primary isolation valves, especially on environmentally sensitive projects.

Meeting these low levels is a challenge, which BMT Instrument has solved with the new ball and needle valve designs used in these DBB valves and mono flanges.

These designs meet the highest class 'A' level over the temperature range -29°C to +180°C, alongside the standard instrumentation manifold pressure ranges.

Production testing and certification is available upon request. Please specify sample quantity required for production testing with your order.

Valve Specification

- Tightness class A $>1 \times 10^{-6}$ mg.s-1.m-1.
- Maximum cold working pressure rating 6,000 psig.
- Temperature rating -29°C to 180°C (-20°F to 356°F)
- ISO15848-1 prototype tested using global helium vacuum method.
- Performance class -ISO FE AH-CO1-SSA1-t(RT, 180°C)-ANSI2500-ISO 15848-1

The ISO 15848 standard effectively sets a requirement for zero emissions for processes involving volatile air pollutants and hazardous fluids. This design has been developed to minimise fugitive emissions.

 IQ - INJECTION QUILL
 FE - FUGITIVE EMISSION
 LD - LOCKING DEVICE
 AT - ANTI TAMPER KEY
 FS - FIRE SAFETY

8. Body material

SS(NIL) - ASTM A182 F316
 105 - ASTM A105
 LF2 - ASTM A350 LF2
 F51 - ASTM A182 F51
 M - MONEL ALLOY 400

Monoflange valve

Features

- ANSI B16.5 flanged inlet connections 1/2" to 2" sizes.
- Class 150 rated to class 2500 rated.
- 1/2"-14 NPT(female) standard outlet.
- 1/4"-18 NPT(female) standard vent.
- Standard materials of connection: Stainless steel
- Optional materials on request.
Stainless steel ASTM A182 F316/F316L
Carbon steel ASTM A350 LF2/A105
Duplex ASTM A182 F51, Super Duplex
Monel, Hastelloy, 6Mo, Incoloy.
- Combined needle and OS & Y valves available.
- Raised face and ring type joint flange face styles.
- One-piece forged construction flange as standard.
- Fire safe designed to meet BS 6755 Part 2 / API 607.
(As option)
- Pressure boundary designs calculated to ASME VIII Div 1 and verified by testing.
- Heat code traceable material to EN 10204.3.1.
- Bubble tight shut off valve seats 17-4 PH tips standard.
- Optional PEEK tips available.
- Colour coded functional valves.
- Locking and anti tamper devices for all valve types available. (as option)
- Permanent marked body with full order and specification details.
